About this item

- **SAFETY LID DESIGN & OVERLOAD PROTECTION** - Corn grinder made of food-grade stainless steel, sturdy and durable. The electric grain mill grinder herb equipment will automatically turn off the power when overloaded, to protect your safety, gently press red button reset, you can continue to use it normally. Recommend use time is no more than 3 minutes. Do not continuously operate the machine, and it takes 5-10 minutes to rest after every 3 minutes of grinding work.
- **STAINLESS STEEL MATERIAL** - The electric grain grinder mill's body is made of high-quality stainless steel and meets food safety requirements. Mills electric grain equipped with 304 stainless steel three-layer blades with 25000rpm super high grinding speed, and the fineness can reach to 50-300 mesh, make the powder more delicate and increase your work efficiency. Dry raw materials only
- **MULTIPURPOSE GRINDER MILL** - Applicable to pulverizing all kinds of dried materials, including grains, soy, corn, barley, rice, wheat, mung beans, coffee beans), spices (star anise, fennel, pepper, rosemary), herbs, sesame, peanuts, walnuts. Please make sure the materials you are going to grind cover the long blade and no more than 2/3 of the jar to leave space for the blade's turning when grinding.
- **180°SWING TYPE** Swing type is more convenient than stand type. convenient to swing the machine body when it is working, which can make powder more uniform and fine. You could swing the machine body to pour the powder out instead of pick up the whole grinder. Spice grinder electric can set the time, 0~5min, it will stop automatically, save your time and effort.
- **CLEANING AND STORAGE** 1. After each grinding, use a moist paper towel or cloth to clean up the food powder, not directly rinse with water, which will damage the motor 2. After cleaning, please put it in a ventilated place, so that the inner compartment to keep dry, do not put in the sun, check the dry and then cover the lid and store
- **!!! Tips:** Due to brush motor, if they both spark and light up in the motor area and fumes arise is normal, which will disappear after you use the machine some times later. when the first several uses there may be a smell, you can Grind some Rice or Dried Tea first several times to eliminate the odor.
