About this item

- ✓ **Structurally Sound & Free-standing** The cubes are structurally sound and won't sag over time. Panel is made of high classed eco-friendly resin material that is very strong to bear heavy weight. The test results show that each cube can support more than 30 lbs. We use wire grid panels at the bottom, which will greatly enhance the load-bearing capacity. The unit can be free standing, and you don't need to secure it against the wall.
- ✓ **Large Capacity & Multifunctional Storage** A total size of 56" x 14" x 70". The size of each cube is 14"x14"x14", 1.6 times that of similar product (12"x12"x12"), fit 13"x13" cube bins perfectly. Great storage space to store a ton of folded clothes, books, bags, shoes, toys and many other things you want! It can also serve as a room divider.
- ✓ **Adjustable & Attractive** The unit can be shaped in any way that suits your space and needs. You can make the most of your limited space by using it! Build your own large cube modular shelving unit or split it in smaller blocks, you name it!
- ✓ **Easy to assemble and dismantle & Portable** The included mallet makes putting it together a breeze, it will just take you about 30 minutes to assemble. The cubes are easy to take apart and rebuild, also light-weight to move if needed.
- ✓ **Dust-resistant, Waterproof & Durable** Dust-resistant storage organizer keeps your items away from dirt and water-proof panels are easy to clean with a damp cloth.
