**LOT 206 - YiLaie Solar Street Light**

**Description**

## **YiLaie Solar Street Light**

- **Solar Powered, 0 Electricity Bill, Low Maintenance Cost** : In direct sunlight, the solar street light's fast-charging solar panel automatically converts light energy into electricity, which is stored in the 11000 mA high-capacity battery. At night, the battery automatically supplies power to the 100W LED street light to provide lighting. Solar light recharges in direct sunlight, so they don't require any additional electricity. Easy to assemble and install, no trenching to lay cables and no electrical outlets required. You just need to make sure your solar lights are placed in a place that receives direct sunlight during the day. The whole process of using, is very assured and relaxed.
- **Waterproof, Long-Time Lighting** : IP65 level waterproof, outdoor light work as usual in rainy and snowy days, solar street lights are fully charged and can meet 5 nights of lighting in continuous rainy weather. We insist on putting product quality in the first place and providing technical support. If you have any questions, please don't hesitate to contact us. Our Customer Service will be more than happy to help within 24 hours.
- **Large Range, Super Bright at Night** : 120 degrees large angle lighting, up to 26 feet (8m) installation height, 400-600 square feet (64 square meters) lighting

area. 100 high bright LED beads, 10000 Lumens, 5700K, enough to illuminate dark areas. Perfect security lighting for your nocturnal activities or nighttime item management.

- **Led Street Lights Outdoor Dusk to Dawn with Motion Detection** : Automatically turns on the lighting at night and turns off and recharges during the day. The solar outdoor light automatically switches to 100% brightness when people, cars, animals or other moving objects pass by, and maintains 30% brightness to save power when no motion is detected. He is smart and sharp, and is a great helper for night lighting.
- **10 Minutes Quick Installation** : Solar street light with wireless design is easy to install, doesn't require annoying wires or adapters, and doesn't require buying batteries. Just fix on the exterior wall or pole with the included screws.
