**LOT 94 - LYFT ICE COOL NICOTINE POUCHES - 10 PACK - NEW**

## Description

# LYFT ICE COOL NICOTINE POUCHES - 10 PACK - NEW FACTORY SEALED PACKAGE.

Imagine the chilly yet warming winds during a cold winter day in the alps, with the sun shining on your face. That's the feeling of the **LYFT Ice Cool Mint**. If you have tried the Epok Ice Cool Mint, then you know exactly what I'm talking about. You are filled with an intense strength from the peppermint and nicotine levels along with hints of sweetness and herbal tones. This combined gives you a warming yet cooling sensation under your lip.

The nicotine pouches are 100% free of tobacco and come in a slim, all white format with a nicotine level of 14mg/g. The material is soft and made of eucalyptus and Scandinavian pine. If you are looking for a comfortable fit and less drip, then you have found what you are looking for. Ice Cool Mint has a strong nicotine level and gives that little extra nicotine kick! Not only that, the special thing about LYFT is that the pouches leave no discolouration on your teeth. The future of snus is upon us!

The story behind LYFT is rather interesting and somewhat confusing. The question of whether LYFT and Epok are the same product with different designs or if they are two independent snus brands. According to Fiedler and Lundgren the LYFT nicotine pouches go

through a similar environmentally friendly production, they offer the same nicotine strengths and flavours, the only difference is that LYFT is 100% free of tobacco, which Epok is not.

**Quantity: 1**
