**Description**

## **myTouchSmart 41381 Wall Motion Activated Timer, Simple-Set, Up to 30ft. Away, 150 Degree Sensor, Single Pole, LED, On/Off, 120VAC, White**

- Motion Activated – Sensor detects movement up to 30ft. away in a coverage area of up to 150 degrees to activate LED, CFL, incandescent and halogen lights
- Push-Button Control – Simple-set push-button settings control operation mode, adjust time-out duration from 1-30 minutes and select motion sensitivity from low, medium or high
- Lighting Options – Choose occupancy mode for automatic ON/OFF operation or vacancy mode to manually turn the light on and off automatically when motion is no longer sensed
- Single-Pole Installation – Space-saving screw terminals allow easy single-pole installation (neutral wire required) while the included white and light almond doors match existing switches, conceal buttons and LED indicators, and serve as manual ON/OFF button
- Power Ratings – 120VAC, 50/60Hz, 15A resistive, 1200W tungsten, 5A/600W electronic ballast/LED, 1/2HP motor

**Quantity: 1**
