LOT 66 - Honeywell Home Electronic Non-Programmable Thermostat

Description

Honeywell Home Electronic Non-Programmable Thermostat

Open box return.

Overview

The RTH5160 Non-Programmable Digital Thermostat has clear readings, single-degree control, and basic functions – on a backlit display that shows both your current and set temperature. Featuring auto-change from heat to cool and a reminder alert for the batteries, you can be confident your comfort stays intact - even during a power outage, thanks to memory storage. It's designed to be compatible with most systems

and easy to install thanks to the UWP mounting system, included mounting hardware and quick install guide.

- The RTH5160 non-Programmable Thermostat offers single-degree control, a straight forward display and basic buttons to keep operation simple
- Precise temperature control of +/- 1 degree Fahrenheit
- Backlit LCD display shows current room temperature and set point temperature simultaneously
- Features auto changeover between heat and cool and a reminder alert for low batteries
- Program is retained in memory in the event of a power outage so you can be confident your comfort stays intact
- The UWP mounting system, included mounting hardware, and quick install guide can have your thermostat up and running quickly
- Requires 2 AA batteries (not included)
- Compatible with: forced air (gas, oil or electric), hot water and steam, and heat pumps with electric backup
- Does not work with electric baseboard heat (120-240V)

Quantity: 1
