**LOT 143 - BORA NGX Rip Fence for Saw Parts & Attachments - 24-in Cut Capacity, Micro Adjustment, Tool-Free Mou**

### Description

## BORA NGX Rip Fence for Saw Parts & Attachments - 24-in Cut Capacity, Micro Adjustment, Tool-Free Mounting

This rip fence is new in an open box.

Overview

The Bora NGX twin rail rip guide offers the ultimate in control and precision for you circular saw. Simply mount your saw by aligning the saw cursor with the saw plate cut line, slide the saw lock mechanism forward and cam the lock forward. That's it! No tools needed. Non-skid surface on the saw plate holds the saw in place securely allowing excellent cutting confidence. The twin rail system keeps the guide from racking while aligning and making cuts. Generous lead in on front of the guide keeps your cut line true from end to end. And actually aligning the saw left or right to make your cut has never been easier either! Unlock the micro adjust cam and slide the saw plate along the aluminum guide rails to your cut line. Or use the handy and precise ruler on top of the aluminum guide rail to match your cut size. Need to move your cut a smudge? No problem. Just give the micro adjust knob a twist and dial in the precise cut location. Lock down the cam and make your cut. Hand hold and material edge guide are generously sized for easy and intuitive use. Natural lubricity along the guide edge and bottom allow for smooth cutting.

- 24 inch cut capacity
- Micro adjustment capability
- Tool free saw mounting works with right or left hand saws
- Easy repeatable cutting
- Saw aligns and locks in seconds

**Quantity: 1**
