About this item

- **SOOTHING MASSAGE SYSTEM:** The Coleman Tahiti Inflatable Hot Tub Spa features 120 jets which release air bubbles to create a warm, relaxing experience at your home! The massage system has two different intensity levels for your preference.

- **CONTROL AT YOUR FINGERTIPS:** You can adjust the water temperature, activate the Power Saving Timer, run the water filter and control the AirJet system from inside the tub, using the digital control panel to manage the spa's settings.
- **40% MORE ENERGY EFFICIENT:** The specially constructed EnergySense insulated cover is 40% more energy efficient than similar inflatable spas. The cover prevents debris from collecting and retains heat more efficiently, meaning the water stays hotter and your energy bill stays lower.
- **DURABLE CONSTRUCTION:** The inflatable walls are made of durable, puncture-resistant DuraPlus material which is more tear-resistant and stretch-resistant compared to PVC. The portable spa will retain its shape no matter how many times it's inflated and deflated. FreezeShield technology automatically prevents the spa's inner components from freezing at colder temperatures.
- **USER-FRIENDLY DESIGN:** The round tub shape is 71" x 26" and fits up to 2-4 persons, making it a great addition to your patio or backyard. The included pump inflates, runs filtration and the AirJet system which can be managed from the app or the digital control panel. It also acts as a tray and cup holder.
- **NOTE:** APSP-14 and Title 20 compliant. This model meets all energy efficiency conditions required for sale in the following states: CA, OR, RI, MA, NJ, ME, NY, NV, MD, WA, D.C.
