Overview

Klein Tools Non-Contact Voltage Testers detect voltage in cables, cords, circuit breakers and more without needing to touch live wires, enhancing safety. Built to last, these testers are dustproof, waterproof, and can withstand drops, ensuring durability in any environment. NCVT3P and NCVT1XT are perfect for both trade professionals and home enthusiasts seeking reliable performance.

- Dual-range capabilities on NCVT3P allow it to detect voltages from 12 to 1000V AC or 70 to 1000V AC, making it suitable for both low-voltage and standard-voltage applications
- Use NCVT3P in low voltage mode for testing tamper-resistant outlets
- The NCVT3P features a bright flashlight that illuminates the work area and can be used independently of the voltage detection function
- Testers detect voltage with simultaneous visual and audible indicators: a green light for no voltage, and a high-intensity red LED and audible tone when voltage is present
- Lightweight, compact design with a convenient pocket clip for secure storage and quick access
- Durable testers are dustproof and waterproof with an IP67 rating and drop protection
- Auto power-off feature conserves and extends battery life; both testers come with 2 x AAA batteries
- CAT IV 1000V rating provides expanded operation and protection
