About this item

- **ACTIVE SWAY CONTROL.** The TruTrack doesn't just level the vehicle and trailer. It also actively resists trailer sway. It uses a spring and cam system and fixed support brackets to stop trailer sway at four distinct points for a smoother, safer ride
- **PRECISE WEIGHT DISTRIBUTION.** The TruTrack weight distribution hitch with sway control offers precise levelling of your tow vehicle and trailer. It uses powerful 35-9/16-inch trunnion spring bars and an adjustable shank that fits a 2-inch receiver
- **EASY SETUP.** This CURT weight distribution hitch with trailer sway control is designed for fast, easy setup and adjustment. It features a tilting head with hex castle nuts for easy adjustment without completely disassembling the hitch
- **HIGH-STRENGTH.** For dependable towing strength, this weight distribution and anti-sway hitch is constructed with a welded head and cast steel pieces. This stabilizer hitch is rated for 8,000 to 10,000 lbs. GTW and 800 to 1,000 lbs. TW
- **CORROSION-RESISTANT.** This weight distribution hitch with sway control is finished with a highly durable carbide black powder coat to withstand the rigors of the outdoor elements
