Vehicle Service Type	Truck
Material	Aluminum
Finish Type	Powder Coated

### **About this item**

- **EASY TO INSTALL.** These 5th wheel legs streamline your 5th wheel towing experience. They use simple quarter-turn anchors to quickly and easily drop into the truck bed puck system whenever needed (factory puck system required)
- **ADJUSTABLE.** The quarter-turn anchoring system allows for simple adjustment as needed to provide a perfect fit in the truck bed pucks
- **QUIET TOWING.** Because the anchors are adjustable, they easily eliminate chucking and excessive vibrations between the 5th wheel hitch and puck system
- **VERSATILE.** This set of 5th wheel legs fits the puck system in select model years of the Ram 2500 and 3500 with 8-foot bed. They are rated for 25,000 lbs. GTW (limited by lowest-rated towing component)

- DUAL-COAT. For dependable weather-resistance in your truck bed, these 5th wheel legs feature a dual-coat finish of rust-resistant A-coat and a tough carbide black powder coat

**Quantity: 1**
