LOT 254 - Bostitch Smart Point 2-1/2-in 16 -Gauge Pneumatic Straight Finish Nailer, Untested

Description

Bostitch Smart Point 2-1/2-in 16 -Gauge Pneumatic Straight Finish Nailer, Untested

This nailer shows some use, but this appears to be only cosmetic. As always, we encourage you to inspect items before bidding.

Overview

The Bostitch BTFP71917 smart point 16 gauge finish nailer kit is designed to drive 16 gauge finish nails from 1-1/4-in to 2-1/2-in length. This nailer features smart point technology: easy nail placement as a result of a smaller nose compared to current Bostitch nailers and no need to compress the contact trip to actuate the tool. This unit also features oil-free operation which reduces the risk of oil stains. The tool-free jam release mechanism allows for easy nail removal, and dial-a-depth control allows for precise countersinking of nails. It also has a selectable trigger system for either sequential or contact operation depending on your choice of operation. Other added features of this finish nailer include a fitting, rear air exhaust, and belt hook with integrated pencil sharpener for easy accessibility. Kit includes: 16 gauge finish nailer, fitting, carrying case and extra no-mar tips.

- Smart point™ technology: easy nail placement as a result of a smaller nose compared to current Bostitch nailers and no need to compress the contact trip to actuate the tool
- Drives 16 gauge finish nails from 1-1/4-in to 2-1/2-in length
